

**Jennifer Lane** LEED GA | RA

Although fully set on an engineering degree, Jenni was intrigued with architecture as a profession. After one intro class, she fell in love with design and the idea of architecture as a service to others. To take on the responsibility of the built environment for our future and to be able to shape the physical and social fabric of our cities is her passion. She takes the belief that every project should be a total work of art with an integrated design process and clear goals that are taken through to project close-out and beyond.

A dedicated and detail-oriented designer, Jenni has a background focused on K-12 and higher education with a specialty in planning. She's worked on a wide variety of complex projects from elementary schools in rural Texas to 500 unit student residences in Mexico. She has since expanded her portfolio to include experience in large and small scale commercial office and multifamily housing. This has allowed for a broad experience in different project needs, user groups, as well as, design and technical strategies.

Bachelor of Architecture, Oklahoma State University  
Licensed / Registered Architect in the State of Texas

**Commercial Office Building**

Arista Office, Park 36 Investments - Broomfield, CO 81,000 sf
